wood planks

Professional wiring process

Short and smooth cable management system

- 1) Professional wiring channels are set inside the console, which are compatible with the overall system environment
- 2) Sufficient internal space can make the wiring standard and tidy, Smooth and beautiful, reasonable and safe
- 3) It has the function of separating strong and weak electricity to avoid mutual interference
- 4) Standard 19-inch equipment rack is optional inside, Convenient for 19-inch standard equipment installation and wiring arrangement

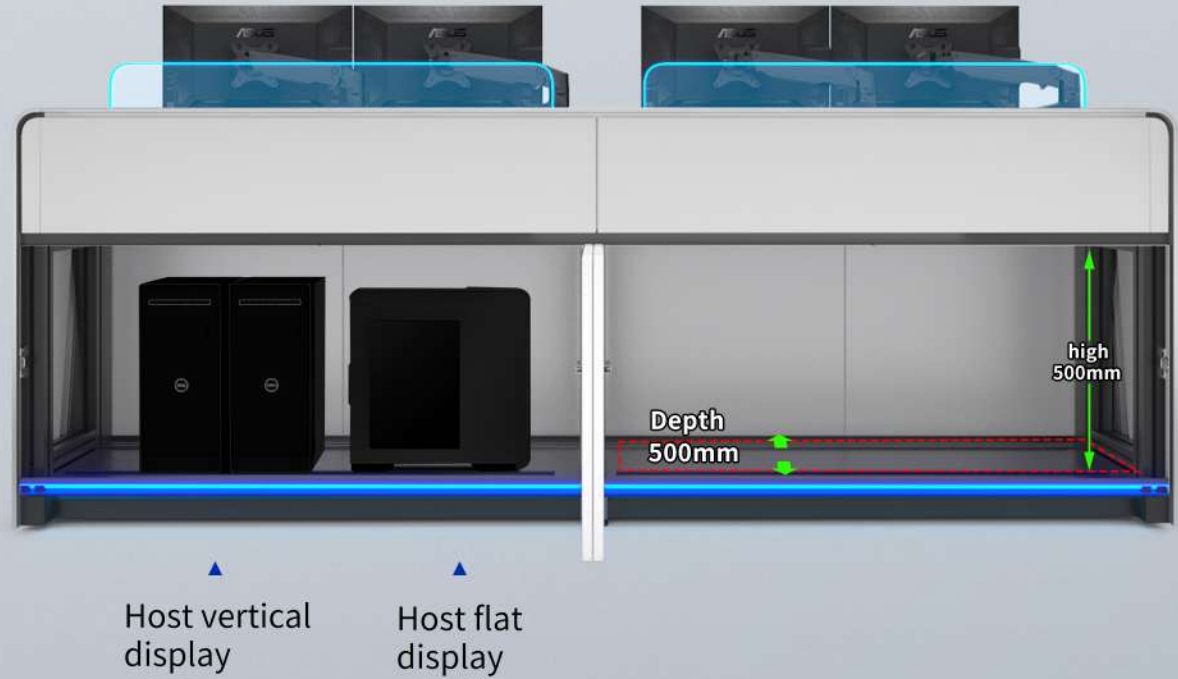

4

Penetrating base cabinet space

Large installation space for easy maintenance

The 500mm base cabinet space can accommodate 2-4 small main cabinets.

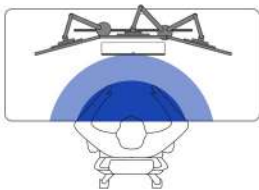

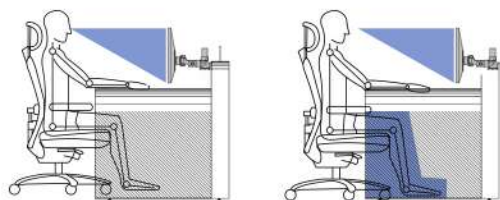

6

Leg anti-collision design

Ergonomic sitting posture

- ▶ 1) Adjustable display stand, front and rear view distance and tilt angle can be adjusted
- ▶ 2) 450mm leg extension space

☰ Material is introduced

Main frame:

Using 6063-T5 aluminum alloy profile, the overall strength is three times higher than that of the traditional console, the load-bearing capacity is increased by two times, corrosion resistance, acid and alkali resistance, never rust, and a life span of 20 years without deformation.

Surface treatment:

After processing and forming, it goes through 8 pre-treatment processes such as pickling and phosphating, and high-temperature drying to ensure sufficient corrosion resistance, scratch resistance, and yellowing resistance to become excellent performance, making the metal surface lasting forever.

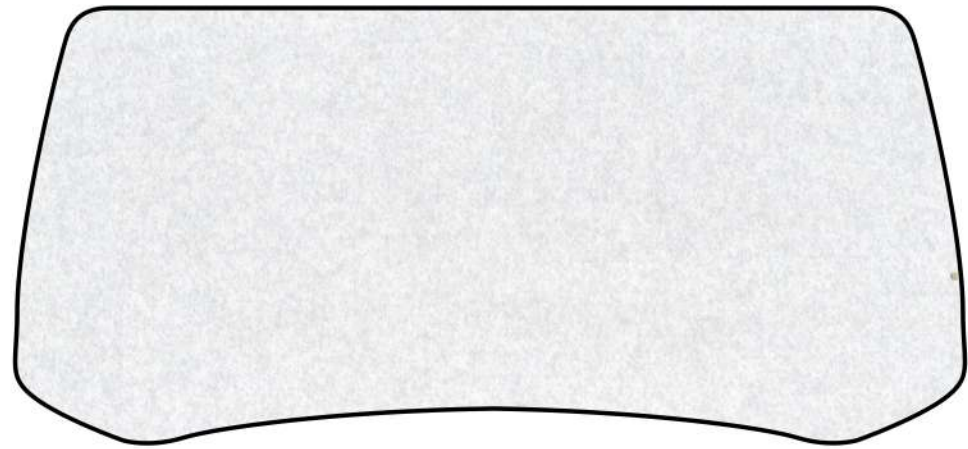

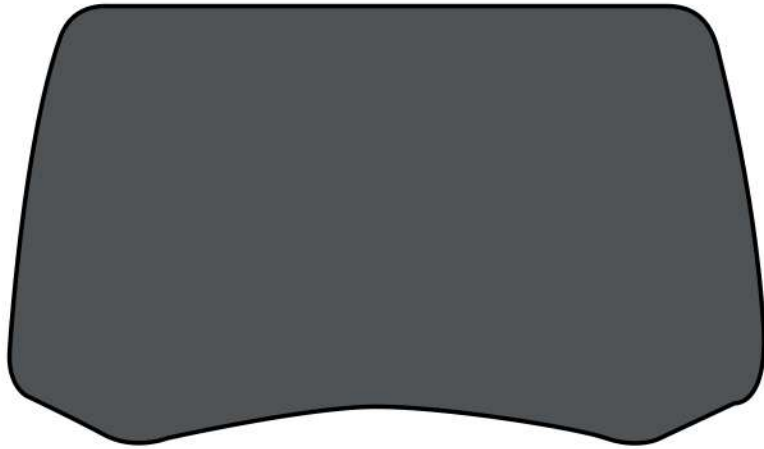

Imported OSB

With high-quality E0 (national standard E1) OSB Ouzong board as the base material, the surface is professionally processed by "melamine (MELAMINE). It has excellent moisture resistance and shrinkage resistance, because the abbreviation (Melamine Faced Board) MFC is widely used in office furniture, mainly with console surfaces, side panels and door panels.
